## 6) Growth for Good: the enrolment of capitalism in the fight against the climate catastrophe

### Benchmarks

- What?** Talk / Book Presentation  
**When?** Tuesday (03.05.) from 6:30 to 8 p.m.  
**Where?** S 108 (FAN D)

Economic growth is wrecking the planet. It's the engine driving climate change, pollution, and the shrinking of natural spaces. To save the environment, will we have to shrink the economy? Might this even lead to a better society, especially in rich nations, helping us break free from a pointless obsession with material wealth that only benefits the few? In the presentation of his book Growth for Good, Terzi will answer these questions on the basis of the evolutionary and cultural origins of our need for growth. Terzi will talk via Zoom and we are going to watch his presentation together in the seminar room. The event will take place in English.
